Important Information

Interest Rate Definitions

Gross Rate - Gross Rate interest is the interest payable without taking account of any tax payable. From 6th April 2016 we will no longer deduct tax from the interest earned on your savings, following the introduction of a Personal Savings Allowance.

If you earn interest over your Personal Savings Allowance you will be required to pay any tax due yourself directly to HM Revenue and Customs

If you would like to read more about your Personal Savings Allowance, please visit the Government website www.gov.uk.

- † AER (Annual Equivalent Rate) The Annual Equivalent Rate illustrates what the interest rate would be if interest was paid and compounded once each year.
- # EAR (Effective Annual Rate) The Effective Annual Rate is used to express the cost of borrowing on current accounts. The EAR takes account of the rate of interest charged, the frequency it is levied to accounts and compounding of interest. It does not include overdraft fees and is variable.

Rates of interest are subject to variation but are correct as at 1st April 2015. You can find out about our current interest rates:
